

DIGNITY IN SCHOOLS

DIGNITY IN SCHOOLS CAMPAIGN | INFO@DIGNITYINSCHOOLS.ORG | WWW.DIGNITYINSCHOOLS.ORG

Meaningful education reform must prioritize equitable and positive learning environments for our nation's children.

As parents, students, educators, and advocates, we firmly believe that our nation's "graduation rate crisis" is in reality a "pushout" crisis.

It will never be resolved, and our "achievement gap" disparities never closed, until our schools are called on to improve student engagement and reduce reliance on exclusionary discipline.

THE DIGNITY IN SCHOOLS CAMPAIGN challenges the systemic problem of pushout in our nation's schools and advocates for the human right of every child to a quality education and to be treated with dignity.

SUCCESSFUL, SAFE, AND HEALTHY STUDENTS ACT (S. 919)(HARKIN, D-IA)

The SSHSA provides a smarter, cost-effective approach for supporting the health and success of students and schools. Like the current Safe and Drug-Free Schools Act, this bill provides funding for efforts to promote physical and mental health, address bullying and harassment through preventive and positive practices, counter school violence and drug-use, and improve school climate. Unlike current law, the SSHSA will better target funding to the needs of districts and provide parents and educators the data they need to address issues unique to each school. This bill includes funding and technical assistance for implementing positive, preventive approaches to school discipline like restorative justice and school wide positive behavior supports.

DIGNITY IN SCHOOLS CAMPAIGN PRINCIPLES FOR ESEA REAUTHORIZATION

Students of color, students from low-income communities, and students with disabilities continue to be treated inequitably in the U.S. education system. Because the ESEA was originally passed to address just such disparities, Congress's reauthorization of the ESEA must focus on ensuring equitable treatment of these groups. Anything less not only exacerbates the ongoing pushout crisis but also turns its back on the very purpose and spirit of this landmark legislation.

CALIFORNIA

California has a pushout problem.

- More U.S. students are being suspended and expelled than ever before. In 2006, **3.3 million students** were suspended out-of-school at least once and **102,000** were expelled.
- California had the nation's **12th highest** out-of-school suspension rate and **10th highest** expulsion rate in 2006.
- *Education Week* estimates that California has the **highest number of dropouts** of any state in the U.S. An estimated **199,446 California students** who entered ninth grade in 2006 did not graduate from high school after four years.

When schools reduce their excessive reliance upon exclusionary discipline and replace them with proven alternatives, we all win.

- School-Wide Positive Behavior Supports: over 10,000 U.S. schools across are implementing SWPBS and seeing reductions in disciplinary referrals and gains in academic performance.
- Los Angeles Unified School District has a district-wide policy for SWPBS implementation. Virgil Middle School in LA reduced its suspension rate from **300 a year to 50 per year** since implementing SWPBS—saving hours of instructional time and keeping students in school.
- Restorative Justice: Denver Public Schools revised its discipline code and implemented training on restorative justice and saw its suspension rate decrease by 40 percent and its arrest rate fall by 60 percent.
- School Offense Protocols: In Clayton County, GA, the juvenile court, law enforcement, and local schools worked together to reduce school arrests and the graduation rate is now up 20 percent.

When students are pushed out, we all lose.

- Out-of-school youth are more likely to be retained a grade, drop out of school, and engage in delinquent behavior. (Centers for Disease Control and Prevention)
- Schools with high discipline rates score lower on standardized tests. (American Psychological Association)
- Expulsion and suspension jeopardize children's health and safety. (American Academy of Pediatrics)

We are losing the future.

Cutting the number of dropouts from California's Class of 2011 in half would contribute to California's economy:

- **\$1.4 billion** in increased investments and consumer spending each year;
- **\$4.5 billion** in increased home sales by the midpoint in these new graduates' careers;
- **8,700 new jobs** by the midpoint in these new graduates' careers; and,
- **\$1.9 billion** in increased gross state product by the midpoint in these new graduates' careers.
